

VERA by AskVet: Your Chat Transcript

VERA

Hi I'm Vera 🙋 I'm a highly intelligent vetbot trained by over 1 million conversations between pet parents and veterinary experts. I'm here to answer your pet questions!

VERA

How can I help you with your pet today?

KAA

my 12 pound dog ate a tablespoon full of avocado. Should I be concerned?

VERA

Yes, you should be concerned. Avocado contains a toxin called persin, which can be toxic to dogs. Depending on the size of your dog, a tablespoon of avocado can be a large amount. If your dog is showing any signs of illness, such as vomiting, diarrhea, or lethargy, you should take them to the vet immediately.

KAA

should I induce vomiting?

VERA

Do not induce vomiting unless Pet Poison Helpline, ASPCA Animal Poison Control, or your veterinarian has instructed you to do so. If your dog is showing any signs of illness, such as vomiting, diarrhea, or lethargy, you should take them to the vet immediately.

KAA

No

VERA

I'm going to send you a transcript of our conversation. Can you share your name?
